

1. Technology

2.3 Industrial Water Related Research (Including Rationalization)

2. Project Name

2.3.20 Review of Plan for Rationalization of Groundwater Use and Guidance Operations (2017)

3. Keyword

Groundwater, Rationalization of water use, Investigation

4. Objectives

This project aims to review and guide businesses through the “Plan for Rationalization of Groundwater Use” that businesses which harvest over 400,000 m³ of groundwater within a year (currently 29 businesses) have been obligated to submit based on Ishikawa Prefecture’s “Ordinance to protect the environment of the home town Ishikawa and raise.”

5. Contents

In FY2017, a review of plan for rationalization of groundwater use submitted by 29 businesses based on the ordinance was conducted. Questionnaires and visits/inspections were conducted on 6 of the businesses. A rationalization guidance plan (draft) was also drawn up and on site guidance based on the plan was given.

6. Reference

This project was commissioned by Ishikawa Prefecture
